## LISTING OF THE CLAIMS

- (Currently amended) A method of treating chronic spinal mechanical pain which comprises
  intravenously administering to a subject in need of chronic spinal mechanical pain relief an effective
  amount for relieving <u>chronic</u> spinal mechanical pain of a bisphosphonate, <u>wherein the</u>
  bisphosphonate provides prolonged pain relief.
- (Original) The method of claim 1, wherein the effective amount is administered in more than one dose.
- (Original) The method of claim 2 which comprises administering said bisphosphonate by intravenous injection.
- (Original) The method of claim 1, wherein the chronic spinal mechanical pain is of nonosteoporotic compression fracture origin.
- 5. (Original) The method of claim 1, wherein the subject is a mammal.
- 6. (Original) The method of claim 5, wherein the mammal is a human.
- (Original) The method of claim 1, wherein the effective amount of bisphosphonate other than zoledronic acid ranges from about 0.5 to about 5.4 mg/kg of body weight.
- (Original) The method of claim 1, wherein said bisphosphonate comprises an aminobisphosphonate.
- 9. (Original) The method of claim 1, wherein the bisphosphonate is pamidronate.
- 10. (Original) The method of claim 1, wherein the bisphosphonate is zoledronic acid.
- (Original) The method of claim 10, which comprises administering the effective amount in a single dose.
